YOUR DESIGN

Ways to make it yours

Our in-house designers prepare your artwork, or create a design from your brief. You approve a proof before anything goes into production.

Rim band

A bold band of colour around the rim, with your logo set into it.

Fine edge line

A delicate line at the edge for a clean, modern finish.

Logo, crest or monogram

Your mark placed exactly where you want it, in your brand colour.

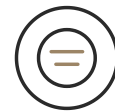

Artwork & patterns

Illustrations, patterns and full-colour designs, wrapped around the piece.

Gold & metallics

Gilded rims, lines and details for a luxury finish.

Backstamp

Your logo, names or a short message printed on the base of every piece.

PRINT METHODS

SMALL RUNS

Digital

No minimum order, so it's ideal for one-offs, test runs and small quantities.

LARGER RUNS

Silkscreen

Richer, more vibrant colour for larger quantities. A minimum order applies.

EXACT COLOUR

Spot colour

The most accurate way to match a specific brand or wedding colour.

- 3 **Approve your proof.** Nothing goes into production until you're happy.

- 5 **Checked, packed & delivered.** Every piece is inspected before it leaves the works.

Lead times

Depend on the pieces, quantity and finish, and are confirmed with your quote. Share your date up front.

Artwork

Vector files (AI, EPS or PDF) work best. High-resolution images (400dpi or more) are fine too.

Your design stays yours

Designs are never shown, sold or reused.

Care

Kiln-firing makes the decoration permanent. Gold and metallic finishes need a little more care.
